C4 WATERMAN

C4 Waterman consists of some of today's most respected and accomplished waterman: Brian Kookana, Mike Fox, Todd Bradley, and slapper Dave Farmer. C4 or C4s 4, represents the 4 core disciplines of a waterman: Balance, Endurance, Strength, Tradition. The goal of the C4 crew is to teach respect for the ocean and the sport, and to return the culture and camaraderie of five waterman, Dave Farmer and Brian Kookana have spent years designing boards at the testing grounds of Makaha Beach. When they designed the first known 10' standup board they took the sport to a new level. These boards are high-performance, the perfect blend of rocker and curves allowing them to paddle fast and surf knee, the most progressive today.

BOARDWORKS AND C-4 WATERMAN TECNOLOGY

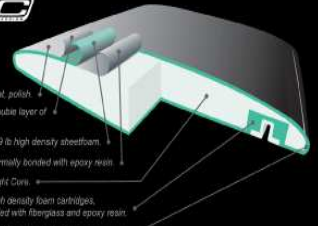

Welcome To
BOARDWORKS SURF

What sets **BOARDWORKS** apart from other epoxy sandwich manufacturers is our proprietary **TEC** (thermal epoxy compression) technology. Utilizing this technology, where we apply both heat and pressure, coupled with the finest epoxy resins, **BOARDWORKS** produces a sandwiched surfboard that is light, light, and very durable. Each **BOARDWORKS** board consists of a dual-density core (eps bonded to a high density divinycell outer shell), fiberglass, and epoxy resins. In our **TEC** construction we are able to replicate a board from some of your favorite shapers that has an amazing strength to weight ratio, and has excellent flex and rebound characteristics that give our boards a "feel" in the water that surfers of all abilities will appreciate.

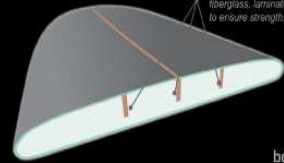

- Besscoat, clearcoat, polish
- Hard laminated double layer of 4 oz fiberglass
- Thermally formed 9 lb. high density sheetfoam
- 4 oz fiberglass thermally bonded with epoxy resin
- 10. EPS Super Light Core
- Fiberglass set in high density foam cartridges, wrapped and bonded with fiberglass and epoxy resin
- Full rail wrap of high density divinycell sheetfoam and fiberglass cloth

E.S.S. Epoxy Stringer System

- (available on all models 3' and up)
- 3 divinycell stringers caddled in 4 oz fiberglass, laminated to the deck sheetfoam to ensure strength, stability and quick rebound.
